Suggestions for an Earth Day Event Using the Shorter SFC video

1. Welcome and introductions (10-15 minutes, depending on how many participants there are).
2. Explain the purpose of the event – to share what Seniors for Climate did across the country in October 2024 and generate ideas and commitments for future SFC events. (5 minutes)
3. Introduce the video, explaining it was made by volunteers across the country who are concerned about climate change and want to encourage others to join them in learning about and acting on the climate crisis. (5 minutes).
4. Show the video (20 minutes).
5. Organize participants into discussion groups of 6-10 people to discuss the following questions and report back the most important points:
    - What did you like best about the video?
    - Who (groups or individuals) in your community might be interested in joining a future climate action under the banner of Seniors for Climate, or what like-minded groups might Seniors for Climate join to increase our impact?
    - What kinds of events are you interested in helping to organize or participate in? (30 minutes)
6. Report back from the groups (15 minutes)
7. Closing remarks (thank you, next steps, etc.) (3 minutes)
